

BÜNGENER PET HEALTH

Where tradition meets innovation

FROM GERMANY FOR OUR PETS

HANS J. BÜNGENER (FOUNDER & CEO)

Mr. Hans Jochen Büngener is the heir to a long tradition in animal health research and pet food development.

Back in the late 19th century, his ancestors developed one of the first specialized pet foods ever available. From then on, the family relentlessly worked to combine tradition and innovation in pet food manufacturing.

As a pet lover, developing and delivering the best nutrition and health products for animals has been a life goal for him.

OUR MISSION

The Büngener family has been committed to delivering the best pet food for over a hundred years. Several generations of the family have worked relentlessly to Combine tradition and innovation.

There is only one possible motivation behind such dedication:
PASSION FOR ANIMALS

Pets are not only animals, but also family members and therefore play an important role in our lives. We believe that inheritance and innovation from R&D to production are the best combination to provide them with excellent nutrition and care.

MEET FRANZYSKA

Every effort has its rewards. Better care and nutrition can give pets longer lifespans.

The Büngener family is passionate about animals and is especially proud of Franzysca, the oldest member of their furry family.

She lived happily and healthily with Mr. Büngener for 26 years.

Franzysca
BORN IN 1994
