## Cat Super Premium pH6.0 Wetfood:

Every cat lover and professional knows that there are three key factors in their nutrition: PALATABILITY, NUTRITIONAL VALUE, and URINARY HEALTH. Our wet food range for cats is delicious and contains all necessary nutrients using only high-quality ingredients. Our pH6.0 recipes help keeping urine pH value on a level which helps controlling the building of struvite stones and may help dissolving existing stones. At the same time, specially adding FOS for immune support and salmon oil for hair & skin care.

## Dog Super Premium Wetfood:

It is no secret, dogs love eating. Wet food can be great by itself or combined with dry food and it has some added benefits: It has fewer carbs. That can be a big help for overweight dogs, or dogs with food sensitivities. Also, it has a higher moisture content, which can help your pet stay hydrated.

Our range of wet food for dogs has high nutritional value, combining select meats together with healthy vegetables that ensure highly palatable and nutritious recipes.
